Chanel says:

Unexpected, sparkling and romantic. Allow yourself to be swept up in the whirlwind of Chance. Similar to the eau de toilette, the eau de parfum is an 'Unexpected Floral', created by Jacques Polge like a marvellous constellation. An unpredictable balance that continually surprises. A constellation of scents, warmed up by absolute of vanilla, where absolute of exotic jasmine and Iris are more pronounced. A mysterious alchemy accentuated by the intensity of the white musk note. Not quite the same, yet not completely different either... With the eau de parfum, CHANCE becomes rounder, more generous and more enveloping... like new love.
